Weekly status:
<p>We did not have a meeting as a group this week mainly due to time conflicts. However, we spent the week continuing our research on our project. Derek and Jason are focusing on the algorithm to use and we have started to finalize the compromise between complexity of the algorithm and ability to reliably test the algorithm. Mike and Joe have continued their research into the hardware needed for the project. They will have to find the best value while at the same time allowing us to have a board that can be configured how we see fit. There may be issues that arise later in the project that we will have to be able to accommodate.</p>
