<b>Weekly status:</b>
<p>This past week we met as a group to sit down and make sure we are still on track for our project. Mike and Joe discussed the hardware block diagram they had created and any work that had been done on finding a board. Jason and Derek discussed their software flow chart and algorithm. For now, the algorithm is going to be rather simple for testing purposes and will be made more complex as time goes on. In this coming week, the group will continue their research into finding a board and the different options. We will also begin to think about the final report as we narrow down our results from all of our research this semester.</p>
