Weekly status:
<p>We continued researching the issue of the USB hub in our project and will continue to do so during this upcoming week. We also met with a graduate student to get some help with programming our board and we had some questions on the best software to use. That was figured out and we are now able to send programs to the board. We will continue to work on and develop our program. We are aiming to finish the general program in the next few weeks and will then move on to testing and refining the program.</p>
