<b>Weekly status:</b>
<p>This past week we were able to obtain the two serial cables we needed for our project. We continued testing our expansion module and were able to successfully communicate with the expansion board and the laptop. We began working on updating our code to account for communication between the on-board RS-232 port and the expansion RS-232 port. Once we get this code working, we will try and transfer a file, rather than simple key strokes, through the board. We will continue working on our brochure and poster for Design Day.</p>
